Jizzakh State Pedagogical Institute (Uzbekistan)

Tiraspol State University (Moldova)

Tabriz University (Iran)

In our modern era, the secrets of science and education as a provider of the use of nature, preservation of the ecosystem and biodiversity, as well as sustainable socio-economic development. This requires joint cooperation that touches the vital interests of the world countries and unites experts from various fields in order to address the existing challenges.

Political, economic, social, and cultural heritage is among the factors conditioning the unity of the global communities. At this time, reconstruction of industry, agriculture, social infrastructure, tourism-recreation, transportation, and communication systems at a contemporary level, investigation of solutions to problems caused by population settlement, as well as assessment of natural resource potential, restoration of ecological balance, the safety of freshwater resources are

of great importance. At this time, the integration of science and education assists in effectively using the potential of all fields. Especially, in this respect, it is planned to hold an international scientific-practical conference on the topic of the "**Modern problems of geography, integration of science and education**" on **November 29-30, 2022**, in order to prepare the scientific basis of the implemented measures, strengthen their innovation, and attract the potential of natural-geographical conditions to the economy.

The main sections of the conference are as follows:

- The current state of landscape use
- Problems of assessment, use, and protection of climate and water resources
- Ecogeographic bases of sustainable development of Azerbaijan, protection of soil and vegetation cover
- Effective use of lands and their ecological problems
- View of young researchers on socio-economic problems in liberated territories
- Socio-economic development of regions, green energy potential, and prospective directions
- Regional characteristics of demographic development, prospects of urban and rural settlement
- Assessment of tourism and recreation potential in ensuring sustainable development
- Problems of using the natural resource potential of the regions and their solution expedients
- Existing problems in the direction of integration of science and education
- Modern problems of teaching the development of regions in higher and secondary schools

Note: Papers are accepted until November 15, 2022.

The proceeding of the conference will be published at the author's expense after they have been reviewed.
